He's Got Your Back

Dr. Bill Sheppard has helped thousands of Katyites find relief for back and neck pain. Here is his secret to success.

How do you help back and neck pain sufferers?

Many of the patients I see come to me as a last resort after they have exhausted all avenues including medicine, injections, and physical therapy. Or they come to me from word of mouth after hearing from others whose back and neck pain was relieved by our DRX9000 machine.

How does the DRX9000 work?

The DRX9000 is a non-surgical way to relieve pressure off the spine and we've had great success for our patients. Patients typically undergo a series of 15 or 20 sessions; each treatment lasts between 30 and 45 minutes, depending on the diagnosis.

Who does it help?

People with back and neck pain issues or those suffering with bulging and herniated discs. We've also had tremendous success helping those with headaches, arthritis, shoulder, knee, and sports injuries. We actually have three DRX9000 units, two for back pain and one for neck pain.

What about medication?

Although medication has its place, it does not fix your back. It works on the symptoms, not the cause. But we've had great success with the DRX9000 machine-it actually fixes your back and stops the pain.

What does it feel like?

Patients describe the treatment as a gentle pull on the spine. Many patients find it relaxing, even to the point of falling asleep during the treatment.

Do physicians refer patients to you?

Yes all the time. I have had numerous referrals from some of Katy and Houston's top medical doctors including spinal and neuro-surgeons who are trying to help their patients find relief. And not only do they send us referrals, many of those physicians are patients of mine as well.

What is the success rate?

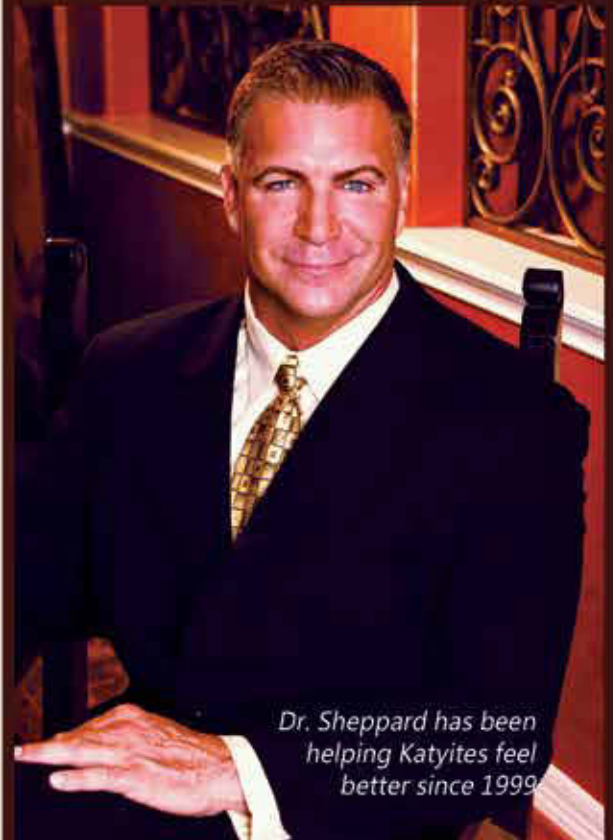

Extensive clinical testing has proven the DRX9000 to achieve an 86% success rate in treating herniated and degenerated discs with less than a 4% recurrence rate of your problem. The DRX9000 was actually just named the number one way to fix a disc over any other treatment available.

Do you accept insurance?

Yes, we accept most types of insurances as well as cash pay patients.

"When I first started treatment with Spinal Decompression, the only thing I was sure of, was that I could barely walk, sit, or stand. After 4 weeks of treatment the pain has slowly gone away. Today, I am 95% better thanks to Spinal Decompression." - Gregory C. Katy, TX

"We've had over 100,000 patient visits so we've gotten pretty good at what we do. I truly care about my patients and get a lot of satisfaction in helping them find relief for their back and neck pain."

Dr. Sheppard has been helping Katyites feel better since 1999

ABOUT DR. SHEPPARD

In addition to being Katy's predominant chiropractor, Dr. Sheppard works in conjunction with a company that provides medical services and consultation to the Houston Texans, the Super Bowl, WWE pro wrestling, AMA Supercross, Indy Car Racing Series, and the world's top pro skateboarders and free-style motorcross riders. He lives in Katy and has two children.
